

# Heigl Technologies

## Hot Melt: Case and Carton Sealing

Heigl Technologies would like to introduce our HAS-HM1256 hot melt. The HAS-HM1256 is a fast setting hot melt for packaging operations. It exhibits excellent bonds on a wide variety of board and paper stocks. Created especially for new board content with high concentrations of recycled material. It has excellent heat stability and low viscosity for good machining on all standard hot melt application equipment. It exhibits aggressive tack, which is important where short compression sections are encountered.

### HAS-HM1256 Technical Data

Application:	Case and Carton Sealing / Tray Forming
Viscosity:	1300 cps @ 350 F
Softening Point:	242 F
Form:	Slats / Chicklet Form
Color:	Opaque Yellow
